DESCRIPTORS	*Agricultural Education, *Directories, Educational Guidance, *Educational Opportunities, National Surveys, Natural Resources, Occupational Guidance, *Post Secondary Education, *Technical Education

ABSTRACT

Curriculums offered, student enrollment, and number of agricultural faculty members are listed for each of the 243 institutions in the United States offering technical education programs in agriculture at the post-secondary level in the academic year 1968-1969. The name, address, and telephone number of the institution and the name of the chief of agricultural education, administrator or instructor for each institution are provided. The document also summarizes the data for the 1966 through 1968 school years. The 4,643 students enrolled in 1968-1969 represented a 34 percent increase over the previous year. Other increases were: (1) part time faculty, 28 percent, (2) full time faculty, 36 percent, (3) number of curriculums offered, 21 percent, and (4) number of institutions offering curriculums, 23 percent. Programs were offered in 43 states and territories. A ranking of states by student enrollment and a numerical summary of curricular offerings are appended. (DM)

FOREWORD

This directory was compiled upon the editor's own initiative during April - September, 1969, in order to contribute to the publicity of technical education curriculums in agriculture and natural resources and to improve the cooperativeness of the administrators and instructors of such curriculums throughout the United States of America.

The first such directory was published by the editor in June, 1968, as a part of a study of the Panel on Two-Year Programs of the Commission on Education in Agriculture and Natural Resources, Division of Biology and Agriculture, National Research Council, National Academy of Sciences--National Academy of Engineering, Washington, D. C. 20418.

Although the information given herein is believed to be reasonably accurate and complete, no guarantee of such is stated or implied.

The editor expresses appreciation to the numerous people who assisted him by reporting for their state, government, commonwealth, or institution. As the second attempt to identify and compile as a directory all technical education curriculums in agriculture and natural resources in the United States of America, he solicits suggestions for improvement and better usefulness of and, of course, more accurate and complete information.

For purposes of this directory, a technical education curriculum in agriculture and natural resources is defined as a curriculum which ordinarily requires approximately 64 semester hours (4 semesters of approximately 16 weeks each) or 96 quarter hours (6 quarters of approximately 11 weeks each)- or the equivalent-for completion; the primary purpose of the curriculum is to prepare for occupational entry into a technical or semiprofessional field rather than for transfer credit toward a baccalaureate degree in a four-year college or university; the curriculum prepares for a cluster of closely related occupations located between the professional and vocational (trade) levels - not for just a single job or one that mainly involves the use of manipulative skills; and the occupational field is in an area commonly associated with agriculture - including horticulture and forestry.
